

WheelTecs

Works quickly.
And intensively.

Best performance WheelTecs is a highly active special cleaner for steel and lacquered alloy wheels. Stubborn dirt, such as burnt-on brake dust, oil residues and dried-on road grime are removed quickly and effectively. WheelTecs contains high-grade surfactants that facilitate the removal of the dirt which is boosted by the high alkalinity. An innovative formula inhibits initial drying after application, ensuring that possible residues remain soft and are easier to remove later.

WheelTecs

Product properties:

- Highly alkaline best performance special cleaner for professional wheel cleaning
- Effective removal of stubborn dirt and grime
- Rapid action
- With built-in dry-on protection
- Suitable for use as a manual and automatic wheel cleaner
- Its dense, voluminous foam also makes it suitable for use as a wheel cleaning foam
- For cleaning of steel and sealed aluminium rims
