

ShieldTecs

Nothing touches it.

The new high-end polymer from ShieldTecs with Organic Modified Polymer Technology, OMP technology for short, provides long-lasting protection against damaging environmental factors such as UV radiation, insects and acid rain. ShieldTecs covers the paintwork like an invisible second skin, where it provides a strong protective barrier against damaging environmental influences. This becomes visible thanks to its sensational beading effect and outstanding drying results, which will impress your customers.

ShieldTecs

Your advantages:

- You boost customer loyalty.
- You attract new customers.

- You generate higher sales through higher washing prices.
