

ShieldTecs®

**ShieldTecs® – the second skin.**

---

Best performance for paintwork.  
And your sales.

---

“AUWA offered me the new ShieldTecs® for testing. After only a few days not only I, but also my customers were convinced of the results. The instantly visible care effect is really impressive, and this is also confirmed by my customers. ShieldTecs® is now part of my wash programme.”

Thorsten Müller, Fahrzeugpflegecenter Geisecke (Germany)

# ShieldTecs® – the second skin.

## How it works:

The new high-end polymer from ShieldTecs with Organic Modified Polymer Technology, OMP technology for short, provides long-lasting protection against damaging environmental factors such as UV radiation, insects and acid rain. ShieldTecs covers the paintwork like an invisible second skin, where it provides a strong protective barrier against damaging environmental influences. This becomes visible thanks to its sensational beading effect and outstanding drying results, which will impress your customers.

**ShieldTecs® – the second skin for paintwork.**

## The advantages of ShieldTecs®:

- High-end polymers
- Long-lasting paintwork protection
- Sensational beading effect
- Pleasant cranberry fragrance

## Your advantages:

- You boost customer loyalty.
- You attract new customers.
- You generate higher sales through higher washing prices.
