

DryTecs

Perfect drying and brilliant shine.

DryTecs guarantees perfect drying results on all paintwork and glass surfaces – particularly for high demands. The innovative formula effectively breaks down the water's surface tension very quickly over a large area. This causes individual water droplets to form on the hydrophobic surface. Special content components optimise the beading effect of the water and cause the droplets to roll off faster – immediately and without leaving residues. Sophisticated gloss components ensure the intense, long-lasting deep shine.

DryTecs

Product properties:

- Best performance dryer concentrate for a brilliant shine
- Excellent beading effect
- Optimum drying results
- Compatible with all wash water conditioning systems

Technical data:

- Consumption per vehicle: 5–10 ml
- pH-value in concentrate: approx. 5

Available packaging:

- 10 kg canister
- 25 kg canister
- 210 kg drum
